

Gruppo SCAI Named Trusted Cloud Consultant by Cloud Security Alliance

Qualification furthers goal of making cloud a safer business enabler

TURIN, 11.04.2023 – Gruppo SCAI today announced that it has earned the Trusted Cloud Consultant trustmark from the [Cloud Security Alliance \(CSA\)](#), the world’s leading organization dedicated to defining and raising awareness of best practices to help ensure a secure cloud computing environment. As a qualified Trusted Cloud Consultant (TCC), Gruppo SCAI is ideally suited to provide cloud security consulting, including assessment and remediation services, to enterprise organizations looking to improve their cloud security postures.

“Cloud security is a complex ecosystem relying on ever-evolving technologies, processes and expertise. Gruppo SCAI ensures full-time cloud security in-house and to its customers to respond to digitisation challenges. Joining the CSA is both a further stimulus and a commitment for us, assuring our customers of the necessary quality and professionalism in an increasingly complex and challenging cyber panorama. CSA and Gruppo SCAI will join forces and skills, aiming to make the cloud an even safer business enabler and accessible to all,” said Gian Piero Pepino, Managing Director Gruppo SCAI.

Despite the fact that virtually all organizations use the cloud, [less than half utilize vendors or tools](#) to quantify their risk. The Trusted Cloud Consultant Program lets cybersecurity consulting organizations and professionals enhance their cloud relevance, providing them with a broad understanding of CSA’s tools and best practices, including but not limited to secure cloud design, cloud architecture, secure cloud implementation, and cloud information security programs, as well as cloud assessment and compliance, risk management, and cloud security governance.

In the cybersecurity sector, Gruppo SCAI has skills that offer end-to-end customer support. Competence Centres further strengthen this group mission. The Cybersecurity Competence Centre exists to share and consolidate the skills of SCAI professionals in various fields who work to protect our customers' data and assets. There are five service lines: Cyber Security Consulting Services, Cyber Security Awareness, Digital Identity Governance & Administration, Managed Security Services, Attack & Defence & Data Protection.

Gruppo SCAI actively collaborates with numerous associations such as CLUSIT - Italian Computer Security Association, AIEA - Italian IS Auditor Association, AIPSA - Italian Association of Corporate Security Professionals. With intense enthusiasm, thanks to this new collaboration, it will participate in CSA Italy events.

“Thanks to the Trusted Cloud Provider programme, CSA offers market support to companies in information and communication technology and cyber security by assisting them in adopting an aware and secure approach to cloud computing. This new membership, we strongly believe, can generate benefits and opportunities for all Gruppo SCAI assets,” said Jim Reavis, CEO and co-founder, Cloud Security Alliance.

A consultant firm receives the TCC designation when they meet the following criteria:

- Are a current CSA [Corporate Member](#) in good standing

- Confirm that each consultant wishing to provide services utilizing CSA best practices has successfully passed the current version of the [Certificate of Cloud Security Knowledge](#) (CCSK) or the [Certificate of Cloud Auditing Knowledge](#) (CCAK)
- Contribute to one or more of the following CSA programs:
 - [Research Working Groups](#)
 - [Chapters](#)
 - [Circle Activities](#)

About the Cloud Security Alliance

The Cloud Security Alliance (CSA) is the world's leading organization dedicated to defining and raising awareness of best practices to help ensure a secure cloud computing environment. CSA harnesses the subject matter expertise of industry practitioners, associations, governments, and its corporate and individual members to offer cloud security-specific research, education, certification, events and products. CSA's activities, knowledge and extensive network benefit the entire community impacted by cloud — from providers and customers, to governments, entrepreneurs and the assurance industry — and provide a forum through which diverse parties can work together to create and maintain a trusted cloud ecosystem. For further information, visit us at www.cloudsecurityalliance.org, and follow us on Twitter [@cloudsa](https://twitter.com/cloudsa).
